6. What is going well in this section and contributes to your learning?

Text Response

Kyle is very clear with explanations and is willing to clarify things and help out.

Kyle is great with reviewing the material in lecture but also engaging us all in discussions that allow us to apply the material we learn. This helps me personally understand how to apply other concepts in lecture to reality.

I think that Kyle really takes the time to make sure that we are understanding the main overarching concepts in class, and emphasizes our learning in a really positive, constructive way.

The overall section environment is awesome - I always feel really comfortable and leave section with a deeper understanding of the course concepts. Kyle's slides and in-section activities are super informative.

I love how we try to apply what we learn to real world circumstances which make the materials easier to understand and more interesting

Reviews material covered in class/textbook, on top of applying concepts to situations/examples to help students solidify their understanding (the candy is a plus!)

The section always has interactive activities to stimulate discussion among students, which is very helpful in understanding some abstract concepts in real-world scenarios. Also Kyle always provides us with organized slides to go over the class materials which is also very helpful in reviewing the materials

cares for students He is very nice also conveys the important things that we should know

Kyle is a fantastic TF. The fact that every section is led with a genuine desire for us to grasp the material helps me to focus. And the different activities keep me stimulated and alert.

He keeps section fluid and active at all times. He gets the students thinking for themselves, but also helps push things along when it is evident that everyone is a little rusty on the subject.

Kyle brings wonderful positivity and enthusiasm to every class. He is patient in answering questions, and he explains things clearly.

Kyle always does a good job of talking about the material from lecture in a way that isn't redundant. I like going over different case studies and doing interactive activities because I feel like they solidify the topics in my mind.

7. What, if anything, could use improvement, and what specific suggestions would you make for change?

Text Response	
N/A	
The week before the midterm, having an intense review session covering as much material as possible quickly would be helpful! But overall love this section!	
I don't really have any ideas for improvement! I have found it very beneficial.	
Nothing comes to mind. Maybe more time spent explaining how section activities tie in directly with course concepts a little clearer?	
maybe more overview of lecture materials and main ideas since lectures can be very fast sometimes.	
None	
I think overall the section is going very well. I would like to have more feedback on the R&W writing assignment so I could better improve the writing	
I like sections just the way they are	
everything is going well as is	
Maybe focusing on some of the topics from the readings that are not covered in class	
I would love to use section time to engage in more rigorous discussion of concepts and experiments.	
I suggest that time management be a little better because sometimes there are other interesting things I know Kyle wants to get to, but we never get the chance to see and discuss them.

9. In what ways could you (and other students) make this class more effective?

Text Response
N/A
Keep discussing more, overall we are good with partaking in discussions.
Sometimes I think we could have more participation about class concepts.
I definitely could step up my game keeping on top of the readings.
participate more, read over lecture slides before section
Participating more in discussions
We can be more engaged in the discussion and provide our own personal stories and experience to enrich the discussion session content
we can do the readings and attend lecture
Contributing to discussion and linking it to lecture
Be more prepared from the readings
I think we could contribute more readily to discussion, and make sure that we are all prepared for section.
This class would be more effective if we came up with specific questions to ask Kyle on topics that we're less sure about.
